DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Pritchard.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Farls.

The inner bag 22 of Farls is detachable from the outer bag t the same degree as claimed.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pritchard or Farls in view of Mercier et al.

Pritchard and Farls each disclose the claimed device except for a smooth-surface outer cover detachably secured to the outside of the mesh main body. Mercier et al. discloses that it is known in the art to provide a detachable outer cover 11 on the

outside of another mesh main body. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the mesh main bodies of Pritchard or Farls with the detachable outer cover of Mercier et al., in order to support the mesh main body.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
